

DENTAL BITES

ProDen DentalCare® Dental Bites promote good dental and oral health. The active ingredient A.N ProDen® is a unique and clinically proven kelp that works continuously with the saliva to soften and loosen existing tartar, while helping to prevent new buildup of both plaque and tartar.

Recommended to help maintain clean teeth in adolescent animals, or after a professional dental cleaning. Also recommended to help fight existing plaque and tartar to support healthy teeth, gums and freshen breath, especially when a dental procedure is not an option. Results are normally seen after 3-8 weeks of continued use.

Contains natural ingredients and formulated specifically for palatability in dogs. With no added sugar, artificial preservatives or colouring, these tasty crunchy bites can be given as treats or a food topper.

Contains less than: 1 kcal per small bite, 4 kcal per large bite.

ACTIVE INGREDIENTS:

A.N ProDen™ (<i>Ascophyllum Nodosum</i>) Specially selected organic kelp	345 mg per 6 small bites	230 mg per 1 large bite
---	--------------------------------	-------------------------------

INACTIVE INGREDIENTS: Organic wheat, organic barley, organic corn, organic rice, olive oil, mixed tocopherols, silicic acid, citric acid, rosemary, natural flavouring (contains milk derivatives).

DIRECTIONS FOR USE: Intended for dogs that have their adult teeth. Choose the bite size based on your pet's weight and give the amount shown below. Can be given in one administration or split throughout the day as preferred, with or without food.

Pet Size	Daily Amount	Small Bites 170g Jar Lasts	Large Bites 170g Jar Lasts
< 10 kg	6 small bites	16 weeks	–
10-25 kg	3 large bites	–	8 weeks
25-45 kg	4 large bites	–	6 weeks
> 45 kg	5 large bites	–	4 weeks

CAUTIONS: Kelp is a natural source of the nutrient iodine. For some animals with thyroid problems it may be important to limit the intake of iodine. Therefore do not use long term or in animals with thyroid disease unless directed by a veterinarian. Do not use in pregnant or lactating animals.

STORAGE: Store at 15°-25°C, out of direct sunlight, with lid tightly closed.
