

POWDER

ProDen DentalCare® Powder promotes good dental and oral health. The active ingredient A.N ProDen® is a unique and clinically proven kelp that works continuously with the saliva to soften and loosen existing tartar, while helping to prevent new buildup of both plaque and tartar.

Recommended to help maintain clean teeth in adolescent animals, or after a professional dental cleaning. Also recommended to help fight existing plaque and tartar to support healthy teeth, gums and freshen breath, especially when a dental procedure is not an option. Results are normally seen after 3-8 weeks of continued use.

Contains natural ingredients and formulated specifically for palatability in cats.

Contains less than 1 kcal per scoop.

ACTIVE INGREDIENTS (per scoop):

A.N ProDen™ (*Ascophyllum Nodosum*)..... 330 mg
Specially selected organic kelp

INACTIVE INGREDIENTS: Brewer's yeast

DIRECTIONS FOR USE: Intended for cats that have their adult teeth. Give one scoop daily, sprinkled over wet or dry food.

Pet Size	Daily Amount	60g Jar Lasts
Cats	1 scoop	6 months

CAUTIONS: Kelp is a natural source of the nutrient iodine. For some animals with thyroid problems it may be important to limit the intake of iodine. Therefore do not use long term or in animals with thyroid disease unless directed by a veterinarian. Do not use in pregnant or lactating animals.

STORAGE: Store at 15°-25°C, out of direct sunlight, with lid tightly closed.
